

6516208091.txt

We are owner/operators traveling 48 States as well as Canada. We need the weather channels to let us know what the weather is where we are going to for safety purposes. Please dont take the weather channels away from us, if so there will be lots more accidents due to the weather changes, ie. ice, snow, rain, fog, or any other weather as well as traffic conditions, like road closures or accidents to avoid. The weather channels are more or less our backbone for driving all these states.

Thank You,
Dawn Ruttan
